Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/556,716	Applicant(s) MCALPINE, JAMES KENNETH	
	Examiner Tuan N. Nguyen	Art Unit 3751	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 2/5/09 have been fully considered but they are not persuasive as indicated below.

Both of the Garguillo and Peterson device require the movement of the seal member up and down to effectively open and seal the waste outlet. Downey teaches an alternative mechanism to move the seal member up and down to effectively open and seal the waste outlet. The employment of Downey is merely a use of known technique to improve similar devices in the same way. One of ordinary skill in the art would have find an effective way to combine the features since the prior art are within the same field of endeavor. Downey is being utilized to modify the stem structure of the Garguillo and Peterson to move a seal member to effectively allow or block water flow. One skill in the art would find an effective way to combine the teaching of the Downey and Garguillo or Peterson to yield a workable plug having a strainer.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 6-14 and 19-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Garguillo as set forth in the previous office actions.

With respect to the argument on page 7, Garguillo teaches the added limitation of a first portion (76) coupled with a second portion (72) and they are separate as a unit from the outlet waste.

4. Claims 1, 2, 5, 7-14, 19-21 and 23-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson as set forth in the previous office actions.

With respect to the argument on page 9, Peterson teaches the added limitation of a first portion (16) coupled with a second portion (50) and they are separate as a unit from the outlet waste.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 15-18 and 31-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garguillo or Peterson in view of Downey as set forth in the previous office actions. The application of less than around 5 lbs of force varies the stem length would have been inherently obvious to one skill in the art at the time the invention was made in view of the Downey reference. The modification of the stem in view of Downey would have the first portion move relative to the second portion as claimed.

Conclusion
